

Vincent Idemyor, PharmD

Professor of Clinical Pharmacology/Clinical Pharmacy | Global Healthcare Consultant

About Dr. Idemyor

Dr. Vincent Idemyor is a distinguished pharmaceutical scientist and healthcare leader with over three decades of experience spanning clinical pharmacology, infectious disease research, and healthcare system development. Currently serving as Professor of Clinical Pharmacology/Clinical Pharmacy at the University of Port Harcourt, Nigeria, Dr. Idemyor brings a unique perspective shaped by extensive work in both developed and developing healthcare environments.

Notable Recognition: Recipient of the prestigious 2023 ASHP Donald E. Francke Medal, awarded by the American Society of Health-System Pharmacists for outstanding contributions to the pharmacy profession.

Areas of Expertise

HIV/AIDS Research & Treatment

Extensive experience in clinical trials and therapeutic strategies for HIV/AIDS management, with pioneering work in resource-limited settings.

Clinical Pharmacology

Deep expertise in drug development, pharmacogenomics, precision medicine, and adverse drug reaction prevention.

Healthcare System Development

Proven track record in establishing pharmaceutical programs, securing major grants, and building institutional capacity.

Infectious Disease Management

Specialized knowledge in tuberculosis, malaria, emerging infections, and antimicrobial resistance.

Global Health Policy

International consultant for organizations including the United Nations and Ford Foundation on health infrastructure and capacity building.

Translational Research

Expert in bridging the gap between research discoveries and practical healthcare implementation.
